

Who is CPS Energy?

Established in 1860, CPS Energy is the nation's largest community-owned, natural gas and electric company, providing safe, reliable, and competitively-priced service to **950,000** electric and **389,000** natural gas customers in San Antonio and portions of seven adjoining counties. Our customers' combined energy bills rank among the lowest of the nation's 20 largest cities – while generating \$9 billion in revenue for the City of San Antonio for more than seven decades. As a trusted and strong Community partner, we continuously focus on job creation, economic development and educational investment. True to our People First philosophy, we are powered by our skilled workforce, whose commitment to the community is demonstrated through our employees' volunteerism in giving back to our city and programs aimed at bringing value to our customers.

We are among the top public power wind energy buyers in the nation and number one in Texas for solar generation.

MEDICAL CENTER TO HAMILTON WOLFE

TRANSMISSION LINE UPGRADE PROJECT

INFORMATION ABOUT THE MEDICAL CENTER TO HAMILTON WOLFE TRANSMISSION LINE UPGRADE PROJECT

What is the Medical Center to Hamilton Wolfe Transmission Line Upgrade Project?

CPS Energy is proposing to reconstruct approximately 1 mile of new transmission infrastructure. Transmission lines consist of specially designed structures composed of steel poles and wires that move electricity long distances at high voltages from station to station.

Construction is scheduled to begin March 17, 2025. Scheduled completion is May 9, 2025.

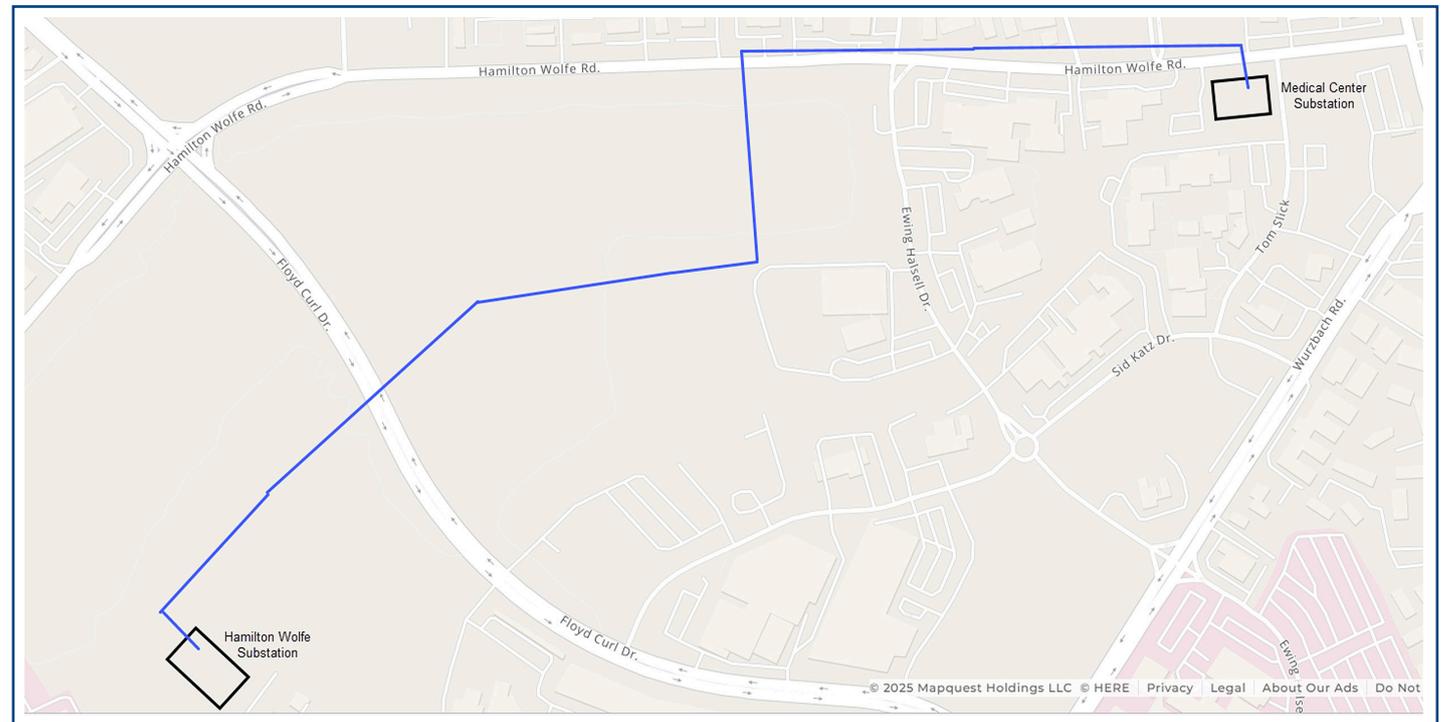

How might this project affect you?

Our contractor will work to minimize impact to area residents and businesses. Construction activities will be focused around the existing transmission line route shown on the Project Location Map.

Why is this project needed?

Maintaining our customers' need for reliable electric power is of utmost importance. The project will improve the quality and safety of an aging transmission line and help ensure electric reliability between the Medical Center and Hamilton Wolfe Substations.
